

PHYSICIAN CORE SEMINAR: CLINICAL MANAGEMENT OF HIV DISEASE

OCTOBER 18, 2010

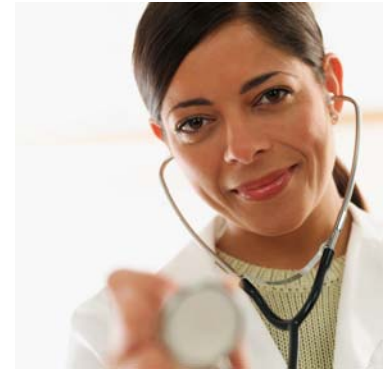

8:30 am - 4:30 pm

INTENDED AUDIENCE:

Primary Care Physicians (including Family Practice, Internal Medicine, Ob/Gyn)
Advanced Practice Nurses, Physician Assistants, and Clinical Pharmacists

PURPOSE:

To reduce the morbidity and mortality associated with HIV/AIDS by helping clinicians effectively diagnose and treat HIV infection based on current DHHS guidelines for testing, primary care and antiretroviral therapy.

PROGRAM OBJECTIVES:

Upon completion of this program, participants should be able to:

- Identify current trends in the HIV epidemic and their implications for clinical care.
- Describe the course of HIV infection and clinical features at each stage of disease.
- Explain laboratory tests used to diagnose HIV and assess a patient's clinical status.
- Identify current recommendations for managing the primary care of patients with HIV.
- Describe the guidelines for the use and monitoring of antiretroviral therapy in patients with HIV.
- Identify patient issues/concerns that affect the care of persons with HIV.

PRE-REGISTRATION REQUIRED: (FEE MUST BE RECEIVED BEFORE PROGRAM DATE)

\$75 / \$40* (*providers serving low-income clients at publicly-funded sites are eligible for subsidized registration).

The registration fee for this program is waived for staff from Part A funded agencies.
